Corporate success at Bosch is determined by innovation capability and an edge in know-how. Accept with us the challenge of new tasks by your willingness to permanently learn something new.

Robert Bosch Car Multimedia GmbH is a globally operating division of the Bosch Group. We develop smart customer-oriented solutions for integrated entertainment, navigation, telematics and driver assistance functions in the Original Equipment business. In this context, we use our specific system integration skills to further expand our leadership position in this area.

Tasks:
If you are enthused about working with cutting-edge technologies, love writing clean code, enjoy being a team player, are not afraid working on a large code base, can apply your programming skills on complex problems and share your skills with other engineers, this job is for you! In this position, you will be expected to:

• Work as part of a dynamic and agile team to bring your personal ideas into the next level of Linux software
• Participate in every stage of the software development from design and brainstorming through feature implementation
• Getting the best performance out of our HW/SW systems
• Getting the best quality (e.g. reset free) out of our HW/SW systems
• Being "the" specialist for Linux debugging and driver development

Skills & Background:
• Developing and delivering software products on Linux platforms
• Thorough knowledge of object-oriented development and design
• Proven record of completing projects on-time and to specification
• Excellent verbal and written communication skills (English, German will be a benefit)
• Working in international teams, distributed all over the world
• Test driven development
• Continuous Integration
• Knowledge about open source community methods and tools in the Linux domain
• Excellent C++, Script programming
• Excellent Linux knowhow
• Hypervisor/virtualization knowhow
• Security concepts of Linux
• Linux driver development skills
• Linux performance optimization
• Unit testing and clean coding
