Purchasing Engineer
Purchase Department – Warndon, Worcester

The overall purpose of the job is to introduce new components to the required standard in terms of Quality, Cost and Delivery at Bosch Thermotechnology.

Role Responsibilities:

- Responsible for the introduction of externally procured component parts and materials via the selection and appraisal of Suppliers in accordance with Bosch procedures.
- Responsible for achievement of project goals (cost, quality, deadlines).
- To work on introduction of new projects with cross functional teams both internally and internationally within Bosch.
- An excellent knowledge of mechanical components, system and manufacturing processes.
- Driver for Advanced Quality Planning and final release of purchased parts ensuring process stability throughout.
- Play a key role in Supplier technical meetings.
- Simultaneous Engineering for new product development.
- Responsible for investigations of alternative materials, processes and technologies and their implementation into the business.
- Provide technical support to the Commercial Buyers.
- Participate in the Continuous Improvement Process.
- Other general projects or Purchase Engineering duties as necessary.

The Person:

- Minimum HND or equivalent in Engineering / Manufacturing discipline.
- At least 3 years experience in a technical field – preferred experience in development, manufacturing, technical purchasing or quality.
• Working knowledge of Advanced Quality Planning tools.
• Excellent communication skills with all levels of the business.
• Must be highly self-motivated with the ability to work with minimum supervision.
• Ability and willingness to travel both nationally and internationally with overnight stops.
• Clean and Full UK driving licence.
• Extensive skills with Microsoft products and use of SAP preferable.
• Oil and Gas boiler product and supplier base knowledge is desirable.
